

Sky Q

interphone
maintaining your security

Interphone has launched an infrastructure enhancement service, as part of our multimedia distribution solution, to make buildings Sky Q ready. The service is available to Managing Agents and Residents Management Companies who are looking to enhance an existing communal system, so residents can benefit from Sky's most advanced TV experience to date.

- Offer residents an advanced TV experience
- Provide access to 4K and multi-room entertainment
- Make a property more attractive to potential residents
- Simple and hassle free installation with no disruption

advanced television experience

Sky Q is the next generation box that allows residents, for the first time, to access recordings anywhere around their flat or apartment on a tablet, mobile or TV for a "fluid viewing" experience, complete with 4K Ultra HD content. No additional cabling is required within the building infrastructure and we will never need access to your residents' homes.

Sky Q allows users to pause a show in one room and carry on in another, and even sync recordings onto a tablet to watch wherever they go. It also comes with a brand new interface and TV guide, a new touchpad remote and a range of new features such as Apple Airplay and Bluetooth.

easy installation

The installation process is simple and hassle free, with a Sky approved installer handling the initial survey; agreeing all requirements upfront with the property manager; and undertaking the work with minimum disruption to the residents. Where extra rack space is needed, Sky will provide another cabinet, while no additional cabling is required throughout the building and we will never need access to your resident's homes.

industry experts

Interphone is a major provider of multimedia distribution systems within the commercial residential sector with more than 55 years of experience. As a result, we can provide you with the very best guidance, technical knowledge and quality standards. As a member of the Confederation of Aerial Industries (CAI), we operate to strict codes of practice for the Installation of Terrestrial and Satellite TV Reception Systems (MDU and commercial).
